

Author: Shinya Murata

is to something as a "professional" to do it with an ease such that it can be considered part of your daily routine. Basically, when you do something out of the ordinary, you get visceral feelings like pain or joy. A professional has gone beyond such feelings, and can act with the natural will with which he breathes or walks.

In this sense are the killers you see in Jackals "real professionals." If they commit crimes, and spread destruction, it is not because they are deprived of humanity - it is simple. Because killing is part of their daily routine...

As for me, I work hard to be considered a true manga professional.

SQUARE ENIX.

Interrupted in their fight, Nichol and Huya were forced to unite their forces in order to defeat two killers from the gang 'Gabriella'. But the taste of their victory is bittersweet: 'Mermaid', the crime division of Gabriella, makes their execution a point of honour. Will they manage to resist them or will they have to leave the city?

Author: Kim Hyun Jin

This year (ie: 2006), the bestware was particularly strong in Korea. How to describe this... Let's say I had the pleasant impression of having a flame, magnificent glass above my head.

It's quite things went the TV was routinely airing programs about families cooling down either on the seaside, either on the mountainside, and this nice, very different cycle went. I think my girlfriend got bored, stayed by me, did, passing my numerous working hours.

As soon as this volume is finished, I'll be taking her to Rab Gane Park.
